Work Experience

QA Engineer

Motorola Solutions | Framingham, MA

March 2025 to July 2026

- Designed and implemented an automated regression using playwright.
- Performed various Testing Types including Functional, Regression, E2E, Smoke, API, Performance, and Mobile.
- Collaborated directly with developers during 2-week Agile sprints to test newly committed code in QA and Staging environments.
- Executed comprehensive integration and regression testing on newly developed modules, ensuring seamless functionality with legacy systems and preventing workflow disruptions.
- Used Testrail to document and update test cases.
- Logged critical defects in Jira with detailed reproduction steps.
- Executed comprehensive backend API testing using Postman/Brun to validate JSON responses, HTTP status codes, and data integrity before frontend integration.
- Participated in Agile / Scrum ceremonies (Sprint planning, daily stand-ups, retrospectives).
- Triaged and reproduced complex customer escalations, performing root cause analysis (RCA) using Chrome DevTools to provide developers with exact error logs and actionable reproduction steps.
- Served as a QA liaison for Customer Success, prioritizing critical production defects and validating hotfixes within strict SLA (Service Level Agreement) timelines.
- Audited web applications for accessibility compliance using Lighthouse and NVDA, collaborating with frontend developers to resolve ARIA label defects and structural HTML issues.

Sr. Technical Support Representative

Motorola Solutions [Rave Alert] | Framingham, MA

February 2022 to March 2025

- Managed omnichannel technical support (calls, emails, remote sessions) for 5+ distinct product lines, consistently resolving 10-20 complex tickets daily while strictly adhering to SLAs.
- Provided high-priority technical support for mission-critical emergency management software utilized by 911 dispatchers, emergency coordinators, and K-12/university campus security.
- Troubleshoot and resolved advanced technical configurations for enterprise customers, including Single Sign-On (SSO) integrations, server setups, and data management workflows.
- Investigated user-reported defects and triaged production escalations (PEs), logging detailed reproduction steps and bug reports in Jira to accelerate engineering fixes.
- Achieved a flawless 100% call answer rate across the entirety of 2024 while serving as a key escalation point in a 24/7 on-call rotation for critical production incidents.
- Authored and maintained comprehensive technical documentation, knowledge base articles, and standard operating procedures (SOPs), establishing consistent troubleshooting frameworks for junior team members.
- Participated in cross-functional bug triage meetings, advocating for defect prioritization based on customer impact, severity, and SLA risk.

Tier 3 Technical Support Representative

Amazing Charts

May 2016 to March 2022

- Identified, reproduced, and logged software defects within the Electronic Health Record (EHR) system, collaborating directly with development teams and management to prioritize and track bug fixes.
- Coordinated and executed beta testing phases for new software releases, gathering user feedback and validating core functionality prior to general availability.
- Utilized SQL to query backend architecture and repair corrupted databases, frequently leveraging Azure and RDP to securely troubleshoot remote client environments.
- Acted as an escalation point for Tier 1 and 2 support, triaging complex technical issues from medical staff and performing root-cause analysis on critical system errors.
- Maintained meticulous documentation for all support tickets, ensuring clear reproduction steps and technical context were recorded for cross-functional teams.

Restaurant Manager

Denny's | Warwick, RI

July 2013 to May 2016

- Directed district-wide email marketing campaigns across 8 store locations, ensuring strict quality control, consistent messaging, and accurate promotional rollouts.
- Conceptualized and launched a "Did You Know" promotional campaign, leveraging design software to create physical and digital marketing assets aligned with national trends.
- Spearheaded local store marketing initiatives and charity benefit nights, coordinating with internal staff and external stakeholders to drive revenue and customer engagement during off-peak hours.
- Designed and proofed detailed promotional materials and content for diverse marketing campaigns, maintaining a high standard of accuracy for public-facing assets.

Education

Marketing (Bachelor's)

Johnson & Wales University-Providence | Providence, RI

August 2011 to May 2013

General Studies (Associate)

CCRI | Warwick, RI

September 2008 to May 2011
